ORGANISED BY

WITH THE SUPPORT OF

Co-funded by Greece and the European Union

SMART VILLAGES

The **Smart Villages Leader Network** is a transnational partnership implemented by the Network of Municipalities of the Attica Islands, under sub-measure 19.3. of the local CLLD/LEADER 2014–2020 program.

Smart Villages are rural communities that leverage innovation, digital technologies, and collective action to improve the quality of life of their residents and strengthen the local economy. Through contemporary solutions, such as the digitization of agricultural activities, sustainable management of natural resources, and strengthening local infrastructure, Smart Villages seek to transform rural areas into dynamic and sustainable ecosystems, attracting new employment and investment opportunities.

The project also includes actions for the exchange of good practices with Finland, Latvia, and Scotland, recording good practices in Greece, creating and publishing informational material, and publicizing the possibilities offered by "smart solutions" for managing issues faced by groups operating in local communities.

«SMART VILLAGES» CONFERENCE

Salamina¹ is becoming a hub for dialogue and innovation! Experts from Greece and abroad will present best practices, technological applications, and strategies for a smarter and more sustainable community. The conference aims to utilize the results of the Smart Villages Leader Network project and the know-how that has been generated through it.

Highlighting the importance of digital innovation and smart solutions in sustainable rural development, through speeches, panel discussions, and presentations of best practices, gives participants the opportunity to learn about the opportunities created in agriculture, tourism, local entrepreneurship, and governance by implementing Smart Villages strategies.

In addition, the conference aims to strengthen networking between local government bodies, academic institutions, entrepreneurs, and farmers, promoting partnerships for the development and implementation of Smart Villages policies.

Through the discussion of European strategies and available financing tools, communities will be given the opportunity to chart their own transition plan towards a smarter and more sustainable future.

The aim of the conference is to highlight at the local level the concept of Smart Villages and the opportunities offered by the integration of such a strategy for networking local community actors.

Indicative thematic areas:

- Smart tourism,
- Smart Health – Digital Health,

¹ Salamina is an intervention area of the local CLLD/LEADER 2014–2020 program of the Cooperation Network of Municipalities of the Attica Islands Regional Unit.

- Digital Public Services,
- Smart Mobility, etc.

During the conference, there will be parallel activities, such as:

- Presentations and trials of applications and technologies,
- Visits to points of interest in the intervention area.

With practical ideas and modern solutions, the conference can provide the local community with the tools to create its own path to development – with a focus on people and innovation.

September 2nd, 2025		Salamina Town Hall, Bogris Hall
